

HYP02 Management Portal

Olympic Developers

Team Introduction

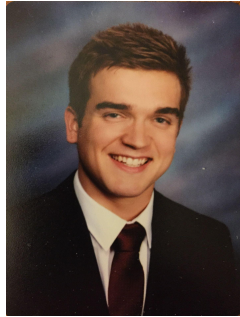

Project Title: Olympic Sport Training Camp Management Portal

Team Mentor: Melissa D. Rose

Developers:

Jason Gaglione

Collin Rampata

Peter Galvan

Camden Hortline

Problem Statement

Managing Olympic performance is incredibly complex

Scheduling for example:

- Around-the-Clock Tailored Treatment
- Travel, Room and Board, Transportation and Nutrition
- State of the Art Facilities and Technology

The current approach to managing multiple teams concurrently is tedious and overcomplicated

HYP02 and What They Do

HYP02's current solution involves:

- Transfer of singular “reference” spreadsheet
- Email primary avenue of data communication
- Manual input in multiple interfaces

Shortcomings:

- No interaction between interfaces
- No real time data transfer
- Tedious Communication

Proposed Solution

An central web application that can be used as a Portal to access:

- Create Training Schedules
- Access Training Schedule
- Request/Remove Treatments/Service
- In House and External Scheduling
- Hierarchy Access
 - Follow HIPAA Regulations
- Notifications for Clients and Administrators

Technology Overview

As a team in order to produce the desired solution we need:

- A Database that can handle:
 - In House data input and storage
 - External data input and storage
- A platform that can:
 - Communicate and update the database in real time
 - Visualize the data in the form of schedules
